Vince

Thanks for the update. I am assuming that we will need (according to the quote) Nuance to install and assist with the testing of this integration / software. Will project management be involved?

Just need to try to prepare for this and do you have an expected date / time frame when all of this will begin. Are we looking at Jan 2012 or sooner?

Thanks

Hi, Pauletta. Just an fyi, I received the revised PO and signed order. It has been sent to Order Dept and you should receive your products shortly.

Thank you for your continued support of Nuance products.

By the way, I just got back from our Sales Kickoff and there's some really cool stuff happening this year with Nuance and you will be impressed and happy, hopefully. Stay tuned!
